B&W Gooseneck & Adapters Turnover Ball

- 30,000 lb GTW/ 7,500 lb VTW
- #1 Hitch in America
- Convert from a hitch to a level bed in seconds
- Meets all OEM fastening requirements
- Precise fit and installation for all full-sized trucks
- Bolts to existing holes in the frame with no drilling or welding
- Installs under the bed with no bed removal
- Requires only a 4' hole in the bed
- Gives you the rugged versatility you want
- Seven towing accessories to accommodate all your needs
- Powder coated for a durable and long lasting finish
- Limited Lifetime Warranty
- All components manufactured in the U.S.A.

One of your competitors uses a pin in a groove, allowing the ball to rotate within the receiver. Is this an advantage?

Why didn't I think of that?

In 1991, we designed and patented a truly innovative solution to the gooseneck dilemma; how to get the ball out of the bed when not towing a trailer. The solution was simple and ingenious. A 4' hole is cut in the bed to accommodate the ball and the mounting system is beneath the bed, bolted to the frame. A spring-loaded handle is attached to a 5/8" steel locking pin that goes through the ball. When you're using the hitch, the handle allows you to retract the pin and stow the ball, upside-down, in the same receiver. The design was quickly accepted as a great improvement to the welded-in-ball and fold-down plates used at the time.

All that, and you don't have to drill through the frame. Genius.

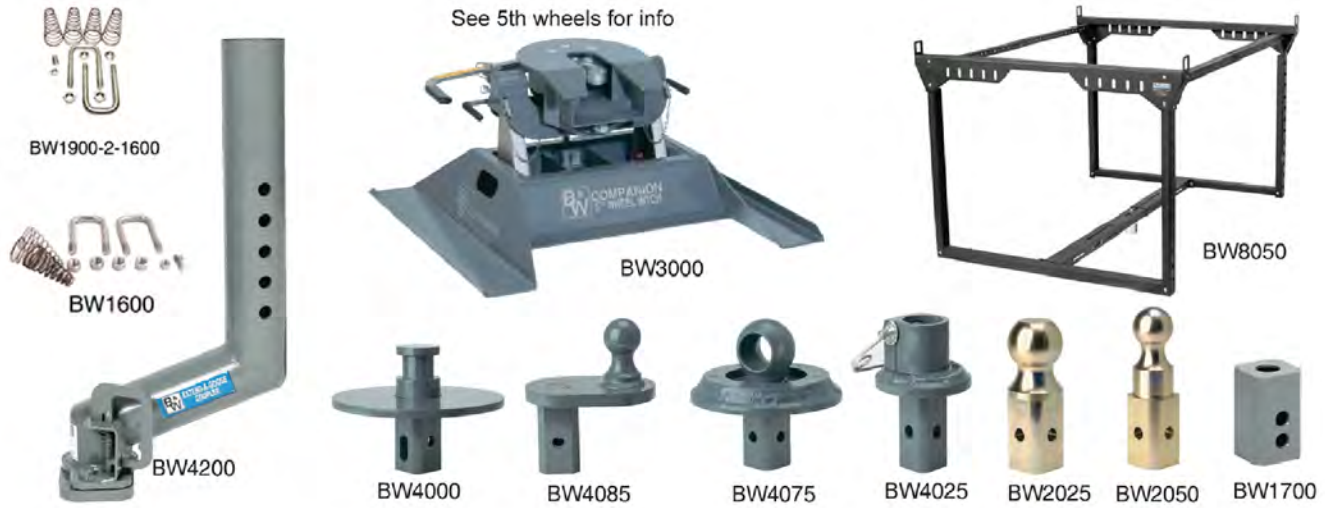

We have designed a Turnover Ball for every full-sized truck on the market so there is a model that fits your truck exactly. We do this so that installing the hitch requires the least amount of modifications to the truck frame... modifications that could void the manufacturer's warranty. From the cross members and center section, to the sideplates and socket top, each part of our hitch is designed with you in mind. Even our safety chain brackets are installed specifically for your truck.

You can trust the Turnover Ball... it's time tested.

The Turnover Ball has been professionally tested and is rated to 30,000 lbs Gross Trailer Weight (GTW) and 7,500 lbs Vertical Tongue Weight (VTW). But even more important to us is the fact that the Turnover Ball is **time tested**. Customers have been hauling their precious cargo with the Turnover Ball for over fifteen years, and it has an impeccable safety record. It's easy to see why; we're committed to quality! All components are made at our state-of-the-art manufacturing facility in Kansas. Because we're so confident in the Turnover Ball, we offer a lifetime limited warranty. **See All In One Fit Guide For Application List**

Gooseneck & Adapters

Gooseneck & Adapters

Pop-Up Gooseneck & Adapters Pop-Up & Flip-Over

Model 108 fits the new 2011 Ford Super Duty
Does NOT require lowering exhaust
Even on Diesel Trucks
Before you purchase another brand
Read their instructions

Raise and Lower the Ball From the Wheelwell of Your Truck.

Raise or hide ball instantly with rod in rear wheel well of truck.

- 30,000 lbs. Gross Trailer Weight.
- 7,500 lbs. Gross Tongue Weight
- 2-5/16" ball..
- Hitch ball fits in 3" hole in bed. None smaller.
- Bolts in place using existing frame holes.
- Includes spring loaded safety chain anchors.
- Installs quickly without loosening bed.
- No welding or fabrication.
- Grade 5 and 8 installation hardware provided..
- 100% complete.

Quick, easy and clean. PopUp gives meaning to the phrase "User Friendly". Tow when you need to, and enjoy a smooth bed for all those other jobs when an ordinary hitch ball is always in the way.

Safe and Strong

PopUp does not sacrifice strength for convenience. Hitches are rated at 7,500 lbs. maximum tongue weight and 30,000 lbs. maximum trailer weight.

PopUp hitch components bolt together with the truck providing an extremely strong and reliable towing system. And you get this comforting strength with only a 3" hole in the truck bed floor, the smallest of ANY convertible gooseneck hitch ball you can buy. And, PopUp hitches are built specifically for each truck model – so they are a perfect fit.

For safe towing, spring loaded U-bolts (which are level with the bed floor when not in use) are provided for anchoring Safety Chains.

The Strength is Built-In

Front and Rear Cross Members are fabricated from 2" X 2.5" X .375" angle. (1" X 2" steel bar is used for the Front Cross Member in Dodge and for the Rear Cross Member in new body style Chevy and GMC Silverado/Sierra.) Cross Members span and sit on top of the truck frame, thereby transferring all trailer tongue weight directly to the frame of the tow vehicle.

Installation is quick and easy without lifting the bed of the truck. [See All In One Fit Guide For Application List](#)

UNDER-BED DOUBLE LOCK EZr™ GOOSENECK HITCH & INSTALLATION KITS

Installation kit required
See table below

Double Lock EZr center section and installation kit in truck bed

Exclusive center locator saves time

Simply drill up from under the bed

Use the pilot hole for error-free drilling

Ball up, ready for coupling

Ball stored, without rubber cover

Rubber cover included

EASY TO INSTALL

Exclusive Center Locator

- Eliminates the need to measure where the ball hole should be
- Eliminates errors caused by drilling
- Orange shavings indicate when to stop drilling the trailer ball hole
- Patent# D685,299 S

Optimum Strength

- Up to 30,000 lbs. GTW / 7,500 lbs. vertical load
Never exceed vehicle's max GTW
- Strong, spring-loaded 5/8" safety chain loops and grade 8 hardware
- Fortified center section
- Meets proposed SAE J2638 testing standards

EZr™ Installation Kits

- Designed for fast, easy installation
- No need to lower exhaust on Ford, Chevy or most Dodge / RAM trucks
- No need to relocate cable hanger and ground wire on Dodge / RAM trucks
- Uses carriage bolts when possible so only one wrench is needed
- Eliminates sheet metal cutting along inside of fender to insert rails
- Drill safety chain loop holes from underside of the truck bed, No measuring required

One-Person Installation

- Kits require only one person to install

EASY TO USE

Flip-Over Ball

- Flip-and-store ball helps avoid trailer ball loss and keeps truck bed free of obstruction
- Chrome trim ring for a finished look
- Rubber trim and hole cover provide protection and prevent corrosion

Sturdy, Reversible Handle

- Heavy duty handle can be positioned on either side of the truck

Double Lock Security

- Double-locking pins in trailer ball provide peace of mind

Limited Lifetime Warranty
